

Paslin Company

- The Paslin Company is constructing a new 166,000 square foot manufacturing building on Shelby Parkway
- The Paslin designs and builds automated welding systems, gauges, tooling, fixtures and special machines
- Paslins mission is to provide leading edge manufacturing equipment to a global market while creating cost cutting solutions where ever possible
- Incorporated in 1937 as a full service company that constructs and integrates assembly and robotic automation manufacturing systems, who currently has three facilities located in the City of Warren
- Provide a wide variety of services such as engineering, hardware and software design, field service, project management and automotive manufacturing system expertise
- Shelby Township facility will create approximately 180 new high technology assembly and engineering jobs
- A late 2014 December completion is planned for this site
- Shelby Township facilitated an expedited permitting process for this project
