OPT-OUT FOR INSTALLATION OF R-900 TRANSMITTER FOR METER READING

I, _____, residing at _____, wish to opt out of receiving an R-900 transmitter on the outside of my home to read my meter. I understand that the non-refundable amount listed below will be charged up front for the cost of a new meter(s) and that I will have to be available during DPW working hours to replace my meter(s).

5/8" meter = \$150.00 each*

3/4" meter = \$200.00 each*

Larger meters – contact DPW for pricing*

If this is related to a new construction home, this amount can be collected with the tap fees. If this is related to an existing home, this charge will be collected immediately, via cash or check.

I also understand that \$25.00* will be included quarterly on my water bill or will appear on any final read bill that is requested. This charge is to cover the cost of the DPW personnel to manually read my meter from the outside of my home.

The current resident of this address may request the R-900 to be installed at any time.
