MICHIGAN.

# South Oakland Macomb Network

Macomb Corridor 2019

**C**ONSUMERS ENERGY is improving safety and reliability for customers by modernizing its natural gas infrastructure in Oakland and Macomb counties.

The South Oakland Macomb Network project is a four-phase, roughly \$200 million effort to replace vintage pipeline dating to the 1940s to help us move more natural gas quickly, safely and efficiently.

The work includes:

- Installing nearly 14 miles of new 12-, 16- and 24-inch pipelines.
- Retiring 29 miles of high-pressure transmission pipeline in Oakland and Macomb counties.
- Rebuilding city gates, where natural gas is odorized and pressure is regulated for safe delivery to homes and businesses.

Preparation work such as surveying and securing easements is underway. Each phase of construction is scheduled to be complete in the fall prior to the heating season.

- You will not experience service interruptions as a result of these upgrades.
- We are committed to operating as a good corporate neighbor and communicating clearly with the communities in the project area.
